

# WELL YOU COULDN'T LAND A PRIVATE JET HERE!

## 10 reasons why you might prefer a Helicopter over a Private Jet.

H

**HIGH-FLYER** - Sit back and relax in comfort as you cruise along at several thousand feet, whilst being treated to spectacular bird's-eye views of constantly changing scenery that stretches out for miles in every direction.

E

**EXPENSE** - Helicopters are more affordable than business jets. There are a vast amount of aircraft sizes and designs on the market - the design, capacity, and manufacturer determining the price. However, depending on how you wish to operate your helicopter, choosing to operate your aircraft commercially could produce some financial return.

L

**LIFE-SPAN** - Helicopters typically have a life-span comparable to that of a private jet, making the investment just as worthwhile. Some helicopter variants even have life-spans of over 50 years, bearing testament to the fact that a well maintained aircraft can be operational for many years.

I

**IMPRESSION** - With many high-end hotels and resorts, stadiums, other entertainment venues and even yachts having their own helipads - what a way to make an impression and of course an entrance!

C

**CHOICE** - With so many different sizes, shapes and styles available, the sky is the limit when it comes to choosing your ideal helicopter. Add to that the interior design and there's a whole new catalogue to look at. From colours to coverings, comfort to practicality, the choice is yours. A word of advice though, your choice should reflect your intended use.

O

**OWNERSHIP** - There are various options available when it comes to owning a helicopter however, these largely depend on whether you want to fly or to be flown. That said, corporate structures and shared-ownership programmes are among some of the ways that you can reduce the costs associated with the purchase and operation of your asset.

P

**PRESTIGE** - If you like the idea of flying like a celebrity or high-powered VIP, then a helicopter certainly fits the bill. Helicopters were the stars of 80's TV shows like AirWolf and Blue Thunder, with the associated glamour and exclusivity resulting in an increase in celebrity pilots, such as Brad Pitt, Harrison Ford and Gisele Bundchen.

T

**TAKE OFF** - The vertical flight capability of helicopters may be their greatest advantage over fixed-wing aircraft. The fact alone that they can fly is amazing but the grace and maneuverability that they possess is inconceivable. With no need for a runway they can take off and land in remote locations including mountaintops, residences, parking lots and even on yachts.

E

**ELITE** - It may not quite be Top Gun with a F14 Tomcat fighter jet but it cannot be denied that owning and flying a helicopter has always had and always will have kudos.

R

**RAPID** - Some helicopters can reach speeds just shy of 200 miles per hour, making it a fast and convenient way to travel from A to B. If you need to visit more than one city in a day, helicopters are an ideal choice and can reduce the need for overnight stays, which can be costly and highly inconvenient.
